## Features of SOC Cum Overload Logger:

- Capacity Based SOC measurement

- SOC shown in real time through percentage with bar and numerical value

- Displays real time Current & Voltage values during charging and discharging of battery

- Overload buzzer indication with blinking display backlight

- An Overload Counter, which records number of times vehicle was overloaded

- If the battery capacity falls below 10% an indication will be given with buzzer beeping

- A Charging indication, where "Charging" text and an animation to support it is shown.
